Policy Area Energy. In addition to the work within the Baltic Energy Market Interconnection plan (BEMIP) High-level group and European Commission's Directorate-General for Energy, PA Energy work is closely linked to the energy grid development and other energy market related issues.

Policy Area Spatial Planning aims at increasing territorial cohesion in the Baltic Sea region. To achieve this, PA is encouraging the use of maritime and land-based spatial planning as well as integrated/ territorial approach to development policies in all Member States around the Baltic Sea and develop a common approach for cross-border cooperation.
