Liveability

Liveability piloting - Co-Designing Urban Development with Communities

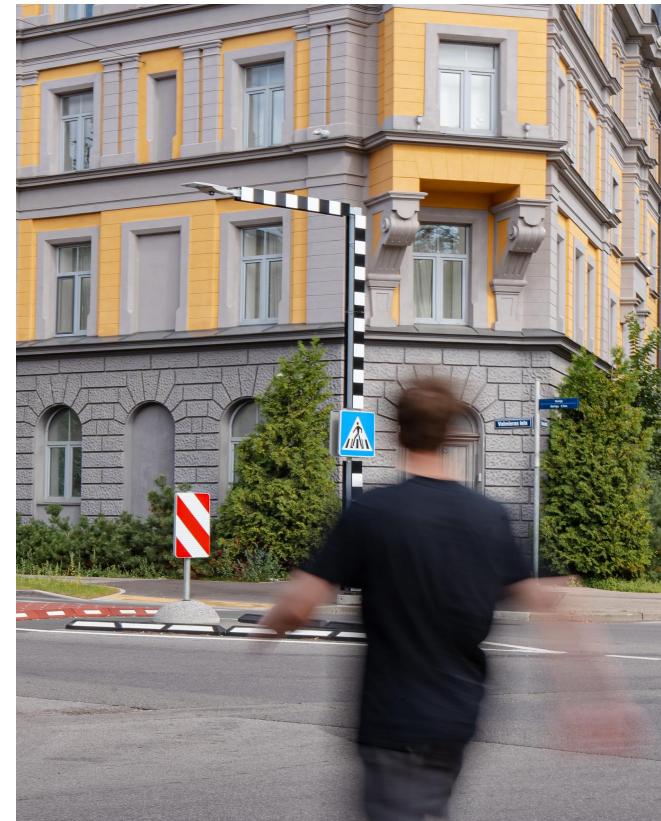

Objective: Engage Riga's communities, especially those in high-impact areas, as active partners with public institutions to co-create urban solutions.

Key Characteristics Supported:

- **Emotional Well-being:** Foster an inclusive, democratic community with mutual respect.
- **Creativity & Participation:** Encourage experimentation and innovative community involvement.
- **Care & Trust:** Build resilient communities centered on mutual trust and care for their surroundings.

Approaches Used:

1. **Design Principles for Public Good:** Utilize tools like interviews and community circles to develop effective co-design methods.
2. **Co-Design with Citizens:** Empower local communities to improve and organize their environments.
3. **Integrated and Holistic Planning:** Enable communities to set goals and participate in bottom-up city planning.

Riga Neighbourhood residents centre

X

Neighborhood associations

Objective: Establish a close and active partnership between the Riga municipality and neighborhood associations to improve quality of life, support community initiatives, and address local issues.

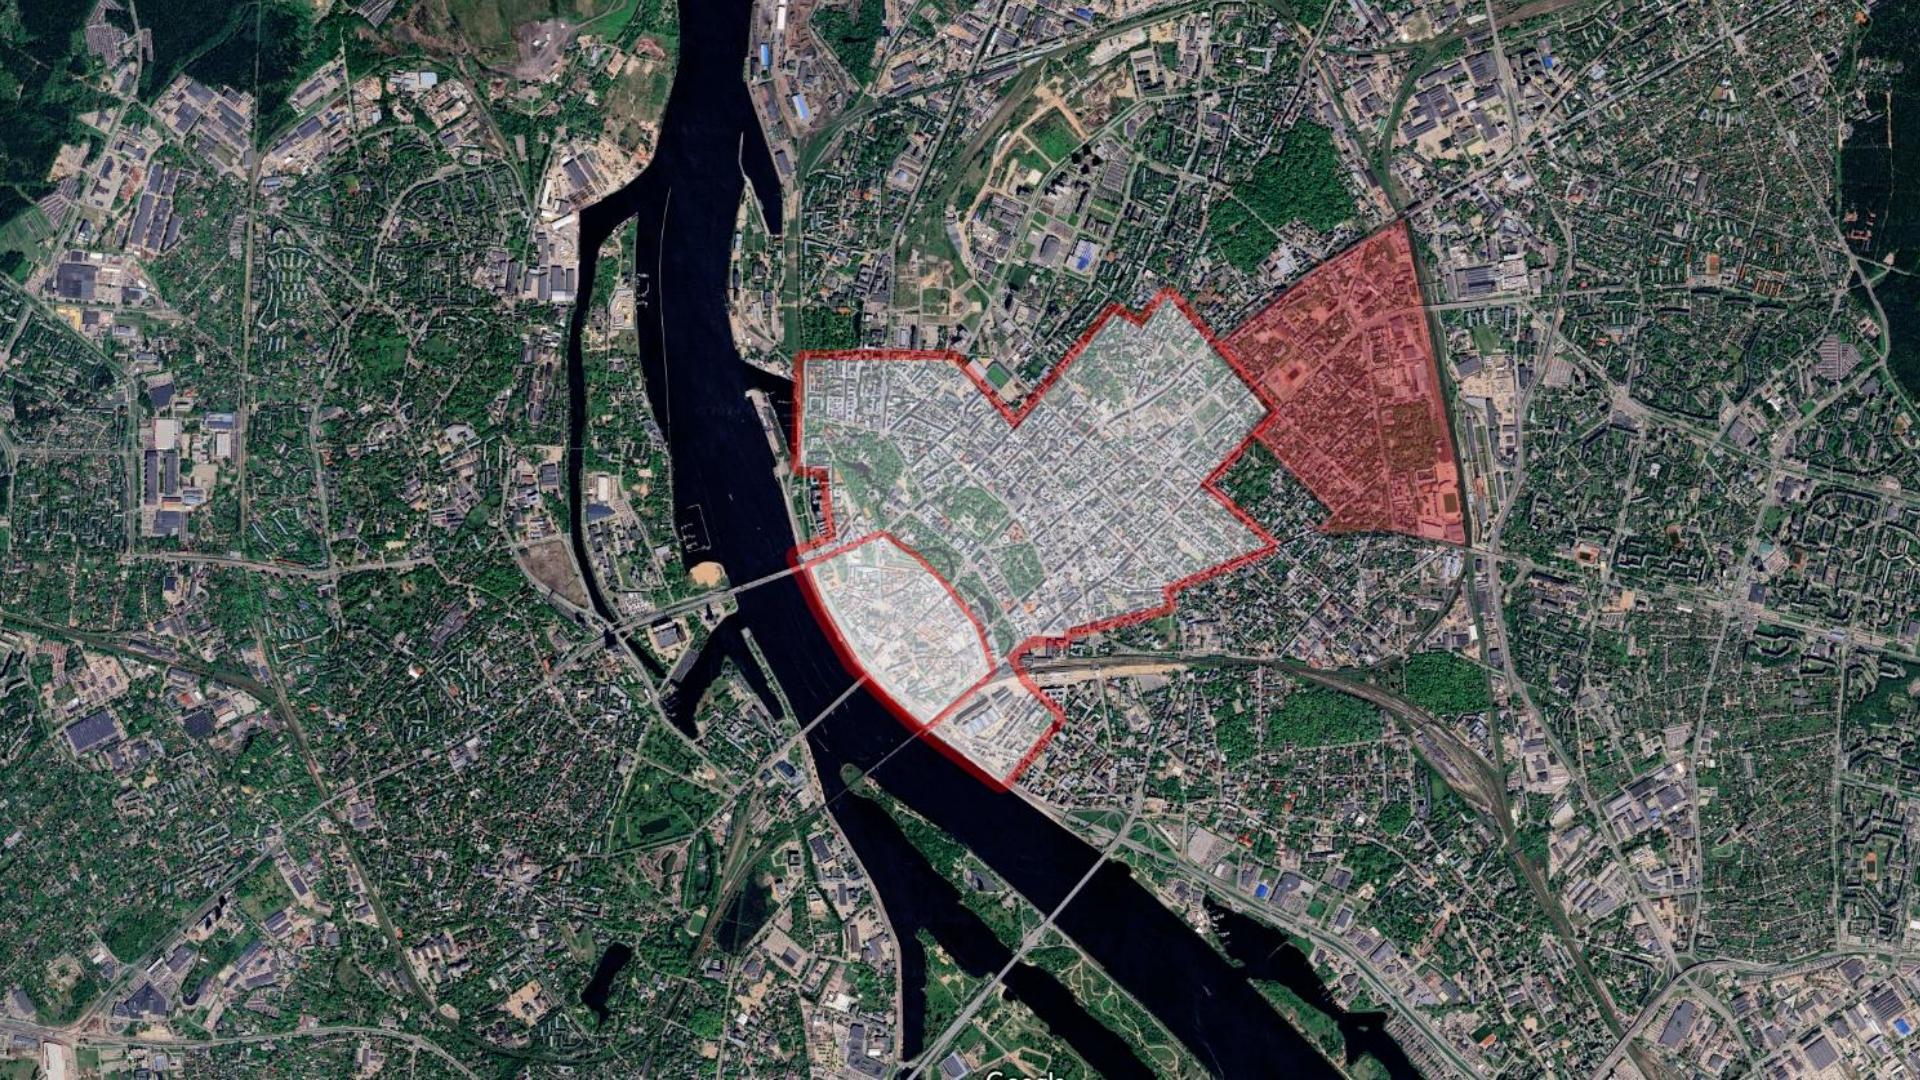

Center Functions:

- Facilitates information exchange and offers consultations on municipal projects and initiatives.
- Provides support to residents, helping them understand and address issues in their neighborhoods.
- Organizes joint events, discussions, and community engagement projects.

Benefits of Collaboration:

- Enhances trust between the municipality and residents by ensuring open and effective communication.
- Helps the municipality better understand neighborhood needs and adjust plans accordingly.
- Empowers residents to actively participate in decision-making and the development of their neighborhoods.
